**At the discretion of the treating physician.
THE LEGENDARY NON-INVASIVE SKIN TIGHTENING TREATMENT WITH THE BENEFITS YOUR PATIENTS WANT.

As we age, the collagen that keeps skin firm breaks down resulting in sagging skin, fine lines, and wrinkles.

Over the next few months, the secondary healing response continues as collagen is deposited and remodeled.

For smoother, tighter skin after just one treatment with continued improvement for up to 6 months.

Thermage® enables you to smooth, tighten and contour on your patients’ face, eyes, and body for an overall younger-looking appearance.

- Up to 25% faster treatment time with the new Total Tip 4.0 cm²
- Optimized treatment algorithm with the site specific tuning
- Vibration elements are integrated with cooling blasts to help aid in patient comfort
- Light, ergonomic handpiece with multi-directional vibration**

*The Total Tip 4.0 cm² is up to 25% faster than the Total Tip 3.0 cm² due to 33% greater surface area.
**Compared to Thermage® CPT handpiece.
A BIG OPPORTUNITY IS STARING YOU IN THE FACE.

The eyes are very important to your aesthetic patients.

> Over 50% of patients are concerned about the eyelids*

> Thermage® treatments are a logical addition to your facial aesthetic protocol to meet your patient’s needs.

> Eye treatments allow you to build an additional revenue stream with aesthetic patients

The results speak for themselves.

Thermage® reduces wrinkles and decreases “hooding” for a youthful, more awakened look.

Improved look of crow’s feet

Up to 25% improvement in lower eyelid tightening achieved by the majority of patients after one non-invasive Thermage® treatment*

88% of patients noted upper eyelid tightening and reduction of hooding*
In a study conducted on 5,700 patients with the first generation Thermage®:

> Clinicians noticed 87% of patients had immediate tightening with 92% achieving tightening for up to 6 months after treatment*.

> 94% of patients found that their treatment results met their expectations*.

Thermage® helps soften lines and wrinkles on all areas of the face.

- Softened wrinkles and lines on forehead
- Improved contours on the face
- Improved look of worry lines and laugh lines
- Softened lines around the mouth
- Increased definition on jawline and under the chin

LET’S FACE IT.

The results speak for themselves.

Before and after photos may be a compilation of results from all generations of Thermage devices including NXT, CPT, and FLX.

*Dover; Results of a survey of 5,700 monopolar radiofrequency facial skin tightening treatments; Dermatol Surg 2007; 33: 900-907

Unretouched photos. Individual results may vary.
The results speak for themselves.

In a body shaping study conducted with 12 aesthetic patients:

> Subjects claiming satisfaction were 89%, 80% and 78% at 2, 4 and 6 months after treatment.*

Non-invasive Thermage® tightens loose skin that fat reduction and muscle building devices are not indicated to treat.

> Body shape is influenced by both contour and skin laxity.
> When treating patients for fat reduction, don’t miss the opportunity to tighten the skin.
> Thermage® can help improve the appearance of crepey-looking skin on the abdomen and legs.

YOU’VE TIGHTENED THEIR BODY, NOW TIGHTEN THEIR SKIN.

Non-invasive Thermage® tightens loose skin that fat reduction and muscle building devices are not indicated to treat.

> Body shape is influenced by both contour and skin laxity.
> When treating patients for fat reduction, don’t miss the opportunity to tighten the skin.
> Thermage® can help improve the appearance of crepey-looking skin on the abdomen and legs.
